Do you want to build your skills in project management, and focus on improving quality, workflow management, processes and systems?

The Master of Business Information Management (MBIM) at the UWA Business School will develop and expand your skills to manage IT infrastructure projects, determine enterprise systems requirements, analyse organisational data for business intelligence, lead information systems strategies, manage supply chains, and apply emerging technologies across the enterprise.

A major focus of the MBIM is developing your ability to work with IT teams to improve operations.

For example, in the Enterprise Information Systems unit, you will learn to:

- Identify and analyse business information requirements related to enterprise resource planning (ERP) software
- Conduct a feasibility analysis for ERP acquisition and make a justified recommendation
- Efficiently navigate and access information in an ERP system
- Liaise with vendors and software specialists in configuring and customising ERP systems
- Assess the potential impacts of ERP implementations

Within the MBIM, the unit Project Management will also develop your capacity to oversee a portfolio of strategic projects. Topics include project creation and planning; scheduling, network analysis and resource management; control of projects during their development and execution phases; organising the project team; and benefits realisation.

You will be able to apply project management skills, tools and techniques in a realistic setting, making use of standard project management software.

Careers

The MBIM is a specialist degree, designed to equip you with an in-depth knowledge of the field. Graduates can be employed in roles including Business Analyst, Logistics Manager, Project Manager and Information Manager.

Course structure

The MBIM consists of 16 units, comprising four conversion units, six core units, and six option units.

Conversion units*

- Business Intelligence
- Client Management
- Electronic Business
- Electronic Marketing
- Introduction to Human Resource Management
- Logistics and Supply Chain Management

Master of Commerce (specialising in Business Information Management)

The UWA Business School also offers a Master of Commerce. This is a generalist degree, and gives you the opportunity to combine broad studies in commerce with a specialisation in Business Information Management.

Learn more at studyat.uwa.edu.au/m/commerce
Delivery
The Master of Business Information can be completed in two years of full-time study, or the equivalent in part-time study. Students with an undergraduate degree in a related area of study may be eligible to receive credit and may be able to complete the course in 1.5 years of full-time study, or the equivalent in part-time study.

This course is delivered on UWA’s Crawley campus, and has intake periods in February and July.

Admission requirements
To be eligible for admission into the Master of Business Information Management, you must meet the following requirements:

- Have a recognised bachelor’s degree with an average mark in the credit range, as determined by the UWA Business School;
- Be able to demonstrate an acceptable level of academic English language competence.

How to apply
Applications can be made online at uwa.edu.au/applynow

Simply complete your details, include all the relevant supporting documentation, and submit your application online.

International students should visit international.uwa.edu.au/students/esos for more information about the study environment, course fees and refund policy, support services, and schooling obligations for dependent children.

“Including a Business Information Management specialisation in my postgraduate studies at the UWA Business School allowed me to transform my career from an IT Engineer to a well-rounded Performance Improvement consultant.

The course is ideal for both tech-savvy and business-savvy students. The real-life case studies and classroom brainstorming emphasise how Information Management cannot be studied in isolation without due consideration to both the technical and the business aspects. The excellent quality of the course content, classroom diversity, and access to renowned, highly qualified (in academia and in industry) professors mean that I would highly recommend studying Business Information Management at UWA.”

Ganesh completed a Master of Commerce (Advanced) in 2012. He is now employed as a Senior Consultant at PricewaterhouseCoopers Australia.
